

ITB 16-037: TRANSIT INTERNET SERVICE To The ICN EQUIPMENT LOCATED AT CORESITE DE1, 910 15<sup>TH</sup> STREET, DENVER, COLORADO And Or EQUINIX DA3, 1950 NORTH STEMMONS FREEWAY, DALLAS, TEXAS

Question 1: For both the CoreSite DE1 and the Equinix DA3 facilities, can ICN provide the floor and suite you use at both locations? This information will identify the appropriate Vendor demarc and cross-connect pricing.

ICN Response:

- CoreSite DE1: floor 07, suite 751, Cabinet: 102.04A, C8639
- Equinix IBX DA3: floor 2, Cage Number: 020460, Cabinet Number: 301

Question 2: What type of physical Ethernet interface does ICN require for both 10Gb and 100Gb Ethernet interfaces; for example on a 10Gb, Vendor typically provides a 10Gbase LR – SMF, 1310nm, LC duplex. Are there different requirements we should be aware of?

ICN Response: 1310nm 10Km optic is being used in the ICN equipment.

Question 3: In Section 3.2.4 we see that ICN will be providing your own IP space. Does ICN need Vendor to provide any additional IPv4 or IPv6 IP space? If so, what size of /IP block is desired?

ICN Response: ICN does not need any additional IP assignments.

Question 4: It is our intent to bid, but we cannot accept all of ICN's contract terms. Will proposing revisions to the contract terms be a disqualifier? Or are there any specific contract terms that you consider non-negotiable that will be disqualifiers if not accepted?

ICN Response: Please review Sections 1.2.2.1, 1.8.12 and 2.1.3.

The ICN is a State of Iowa agency authorized by Iowa Code Chapter 8D and governed by Iowa Law. The terms and conditions provided with the ITB will be the basis for any resulting agreement. While the ICN will entertain revised language suggested by bidders, if identified in your bid response, however we will not renegotiate the entire set of terms.
